

PRESENTING OUR NEWEST INNOVATION

DUAL ENTRY HIGH VALUE CART

The Dual Entry High Value Cart (HVC-DD) is a mobile storage locker that secures, stores, and transports valuable items while providing convenient access for authorized users. Most security carts open on one side; the HVC-DD opens on both, with two sets of double doors made of welded and expanded steel.

Narrow-Aisle Storage for Tools, Supplies, and Materials

The HVC-DD's bi-directional design allows users to reach contents from both sides without repositioning the unit. All four doors open 180 degrees to allow the broadest possible angle of approach to shelving. Between uses, doors lock securely with padlocks (not included), strike plates, and heavy duty steel caging. Use the HVC-DD in narrow aisles and small spaces, or for quick deployment of tools and supplies from two directions at once.

Efficient and Secure Access to Shelving

Two sets of padlockable doors allow users to reach contents from either side without rotating the unit. With all the doors open, the HVC-DD becomes open shelving.

Slim Profile for Narrow Spaces

The HVC-DD frame is slim enough to fit through standard doorways and narrow aisles, but wide enough for high-capacity storage.

Compatible with Material Handling Equipment

Phenolic casters and an ergonomic push bar allow users to move the HVC-DD manually without strain — but it also includes integrated fork pockets and four-point lifting eyes for use with forklifts and other heavy material handling equipment.

Heavy Duty Construction

A welded steel frame and expanded steel caging provide the best combination of capacity, strength, visibility, and airflow. A durable powder coating provides protection from weather and common industrial hazards.

DUAL ENTRY HIGH VALUE CART

HIGH VALUE STORAGE & MOBILE WORKSTATIONS

Durable Construction

Weather resistant heavy duty formed steel construction with increased material thickness for extra capacity and security

Lifting Eye Bolts

Four lifting eye bolts are included for hoisting unit

Cable Payout Option

Replace 1 shelf with (2) brackets and a 2" shaft for cable payout

High Load Capacity

5,000 lb capacity

Adjustable

Three steel shelves are adjustable to fit any use case, with custom modifications, such as more or fewer shelves, fixed-height shelving, and cable reel racking) available on request

Added Stability

A powerful, non-skid floor lock ensures stability during use

Versatile Doors

All four double-hinged doors swing 180 degrees, leaving shelves open to any angle of approach

Branding Options

Comes standard with engravable 3" x 5" asset tag and is available in custom powder coat paint colors to match your companies current branding

Increased Maneuverability

A built in push bar makes it simple to position unit and a slim profile ensures that the HVC fits through a standard commercial 36" x 80" doorway

Travels Anywhere

Smooth-rolling, heavy-duty casters simplify transport

Easy Transport

Fork pockets enable transport of unit by forklift

Perfect for Narrow Aisles

The HVC-DD includes two sets of double doors, allowing users to reach contents from either side
