

PRESENTING OUR NEWEST INNOVATION

WAREHOUSE TRAILERS

Warehouse Trailers (TT) from BHS offer bulk transportation of materials across floors and ramps, and hitch to one another to create high-volume material-handling trains. They are a crucial component of a pick-to-cart strategy, in which order pickers fill trailers to capacity, and tuggers travel in waves to collect items in batches. These industrial carts are ideal for order-picking applications, as a supplement or even a replacement for lift trucks.

Robust Design

All BHS Warehouse Trailers are built for industrial settings, with steel construction and a durable powder coating. Casters are designed to roll smoothly over superflat warehouse floors or rough terrain, depending on the model. As an original equipment manufacturer, BHS can design and construct Warehouse Trailers to meet any specifications.

Effortless Navigation

Travels in line behind tuggers tracking behind each other, holding a line within inches around corners for easier navigation.

Multi-Use Solution

Suitable for manual use or by hitching to a tugger; compatible with all types of electric tuggers

WAREHOUSE TRAILERS

MATERIAL CARTS

Secure Attachment

Standard spring-loaded auto latch

Durable Construction

Heavy-duty steel construction with high load limits

High Visibility

Durable powder coat finish in "Safety Yellow" for maximum visibility; Heat-resistant powder coatings available on request

TT-CS

Maneuverability

Large central wheel on TT-CS models provides unmatched maneuverability

Mobility

Heavy-duty casters travel over smooth or rough terrain

Dependable Travel

Heavy-duty polyurethane-on-steel casters

TT-QS

Custom Wheel Options

Customizable wheels including pneumatic tires and phenolic or solid casters

Universal Hook-Ups

Durable universal tow bars and hitches; Custom hitches available on request

Tight Tracking

Quad steering provides precise tracking fidelity and a tight turn radius

Custom Builds Available

Custom design and fabrication available to support any materials

OPTIONS

Fork Pockets (TT-FP)

Fork pockets allow relocating the Tugger Trailer by lift truck to and from a worksite

Heavy Duty (HD)

Doubles the capacity of all Center Steer and Quad Steer models

Pintle Hook (TT-PH)

Exchange spring-loaded auto latches for rigid pincer-style hitches; ideal for rough terrain.

* Only available for TT-QS models

Pintle Hook Option
